WIRE CLAMP ATTACK LEADS

XB-4 insulation piercing wire clamp to stacking shrouded right angle banana plug test lead. Instant continuity confirmation lets you move directly to voltage checking to disarm or continue diagnostics. Connectors are made from fully insulated plastic material to reduce shorting failures. 24 inch cable; additional lengths available. Black. Part #: XB-4

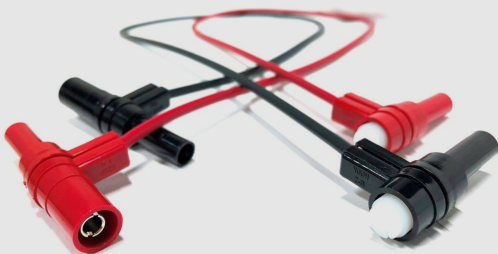

Banana plug designed with an internal circuitry structure that provides confirmation of continuity with a built-in LED light when the wire clamp makes connection with the target wire

- V-groove design allows user to center wire and pull it towards user prior to piercing wire with needle clusters
- Dual-bed of needle cluster provides instant continuity testing

Banana plug securely plugs into multimeters for diagnostic work

XB-4 EXTENSION LEADS

Shrouded right angle banana plug test lead jumper. Use with XB-4 test lead to stack the banana plugs to extend test distance. 24 inch length, 18 AWG PVC wire. Set of 2, red and black. Part #: 9387-24R/B
