

# Energy Electrical Solutions

MADE IN THE USA

E-Z-Hook's extensive knowledge in producing high quality test lead assemblies has been recognized by Energy Utility and Field techs throughout the USA. Whether tasked with reducing the liability of human error or maintaining safety when testing systems in the field, E-Z-Hook has off the shelf components and can customize solutions per your requirements. Our engineering department is prepared to assist. Contact E-Z-Hook today to discuss solutions for your Energy needs.

## Specialized Industry Offerings:

Fused test lead assemblies

Long handle probes to mitigate arch flash during testing

Fully insulated connectors including macro-hooks, probes, alligator clips, and more

Copper contact points for high amperage use

Critical diagnostic test lead devices

Highly flexible PVC or silicone insulated test wire in various gauges

Customized test lead assemblies using client's preferred E-Z-Hook connectors and off the shelf components

Customized labels

Fused safety boxes
