

MEDICAL TEST SOLUTIONS

E-Z-Hook is a US manufacturer of medical testing solutions. These interconnect components are often used as stand-alone measurement devices or as part of a custom designed test assembly for specific applications or equipment. Whether medical personnel need to maintain electrical safety performance standards, run diagnostics on medical equipment, or use E-Z-Hook’s test assemblies to hookup and monitor patients’ vitals, we provide proven design, testing, and manufacturing solutions. E-Z-Hook’s electronic test product lines include validated connectors used in current medical test applications.

Over 30 years of experience designing and manufacturing for the medical field.

E-Z-Hook products are utilized in multiple areas and applications including:

- > Cardiovascular
- > Out-of-Body
- > Dental
- > Medical Battery Devices
- > Medical OEM
- > Monitoring
- > Neuromodulation
- > R & D Test Labs
- > Sleep Apnea Analysis

MEDICAL SOLUTIONS

Stock or custom test leads to immediately hook-up to your medical equipment

Test connectors and adapters for a variety of connection requirements

Wire & Cable spools in up to 1,000 ft spools

Contact materials used in components including beryllium copper, brass, stainless-steel, etc.

Passivation and plating to meet requirements including electroless nickel, gold, tin, etc.

High temperature parts to meet autoclaving and sterilization requirements

Variable spring tension and specialized hook bends

Color coded connectors and test lead or cable assemblies

Test Reports, product testing, and specialized product documentation as required

Medical inspection customized to meet your process requirements

Custom packaging and labeling
